

STELLA

Washroom dispensers

Built to last. Made to be noticed.

A washroom tells people how much you care about your facility

Stella's dispenser range is positioned as an antidote to the disposable replacement cycle.

The market is full of low-cost dispensers that break, discolour, present poorly and require ongoing replacement. While the initial purchase price may be lower, the long-term cost of maintenance, replacement and presentation can be significant.

At Stella, we believe a dispenser should be viewed as an investment rather than a consumable.

A washroom is one of the few spaces every person experiences. Staff, customers, guests, patients and visitors may never notice the flooring, lighting or paintwork — but they will use the washroom. That experience shapes how they perceive the facility.

Our premium dispenser collections are selected to deliver durability, professional presentation and a better washroom experience. They are designed to last, look better for longer and help facilities move away from constant replacement.

Hybrid Ecology

Nature, reimagined.

Created from reclaimed timber residues—including waste from pallet manufacturing—and recycled plastics, Hybrid Ecology gives discarded materials a new purpose. The result is a beautifully textured, exceptionally durable dispenser range that proves sustainability and premium design can exist in perfect harmony.
